

**2016-2017 LCMS ACADEMIC EXPECTATIONS
FOR 5th and 6th GRADE STUDENTS**

It is our expectations that students will take responsibility for their learning and students and parents can expect that our staff will help each child reach their academic potential.

As we prepare our intermediate students to move to the middle school level, and eventually to the high school, it is important for our students to understand that their academic success depends upon their effort and dedication. As a staff, we will help guide students, offer assistance and support, and celebrate their successes with them.

During the school day, there is a scheduled RTI/Core Extension time that is built in. During that time, students who need specific interventions will be pulled to work on skills. In addition, students who have missing work may be required to stay after school to complete this work. Students will be given incompletes for missing assignments and those will need to be completed.

Students who are struggling in math and reading will be recommended for Summer School 2017. Letters will be sent home in late February-early March if your child's teacher feels that summer school is necessary to help your child continue to improve their skills in reading and/or math.

We want to work with parents to help your child have a successful school year.

Revised June 2016
