

**2017-2018 LCIMS ACADEMIC EXPECTATIONS
FOR 7th GRADE STUDENTS**

It is our expectations that students will take responsibility for their learning and students and parents can expect that our staff will help each child reach their academic potential.

As we prepare our students for high school and beyond, it is important for our students to understand that their academic success depends upon their effort and dedication. As a staff, we will help guide students, offer assistance and support, and celebrate their successes with them.

During the school day, there is a scheduled RTI/Core Extension time that is built in. During that time, students who need specific interventions will be pulled to work on skills. In addition, students who have missing work may be required to stay after school to complete this work. Students will be given incompletes for missing assignments and those will need to be completed. Failure to complete the work may result in failing grades and required summer school.

Students in 7th grade may be required to attend Summer School 2018 based upon their academic performance in the classroom, as well as on i-Ready assessments done during the school year. Receiving a failing grade or grades in core classes may result in required attendance at summer school to work on the skills that were failed during the school year and to help the student be successful in 8th grade.

We want to work with parents to help your child have a successful school year.
